

# Professional E-Mobility Product & Pricing Analyst

## Job Purpose:

- The Product & Pricing Professional will play a key role in shaping and optimizing the product and pricing strategy for our E-Mobility services within Retail Mobility & Convenience
- across all countries, targeting both B2C and B2B customers. This hands-on role is responsible for setting up, managing, and optimizing pricing models and product offerings to maintain market competitiveness and profitability.
- The position requires direct operation of the pricing engine and related systems, as well as active involvement in designing, improving, and implementing business processes in close coordination with internal teams.

## Key Responsibilities:

1. Operate and optimize the pricing engine, including management of tariffs, cost rates, kWh-based and time-based pricing, and prioritization rules for multiple charge point operators.
2. Analyse market trends, customer needs, and competitor offerings to inform pricing strategies and product development.
3. Develop and maintain product and pricing definitions for E-Mobility services, tailored to B2C and B2B customer segments.
4. Collaborate with cross-functional teams (e.g., Sales, Operations, Product Management) to ensure seamless implementation of pricing models and product updates.
5. Monitor and report on pricing performance, identifying opportunities for improvement and supporting data-driven decision-making.
6. Design, document, and continuously improve business processes related to E-Mobility services, ensuring efficiency and scalability.
7. Ensure compliance with internal policies and external regulations related to pricing and product offerings.
8. Support the development and rollout of new E-Mobility products and services, providing expertise on pricing structures and business models.

## Requirements:

- University Education Master – Business, Economics, Finance & Controlling, Business Informatics
- Professional experience min. 1-3 years
- Excellent MS Office Skills, Excel, Visio, Power Point
- Experience with tools for defining and visualizing business processes (i.e. Miro, Figma)
- Experience with other E-mobility pricing engines is an advantage
- Analytical mindset and affinity for data & pricing management
- Demonstrates a high level of accuracy
- Working in international, multicultural team
- Reliable, independent, committed, flexible, proactive attitude, result and solution oriented

## Language Skills:

- Slovak language (fluent in written and spoken) – C2
- English language (fluent in written and spoken) – C1
- German language - advantage
